

## BW1116 vs BW1117

## Wholesale Trailer Supply

B&W has discovered that Ford made a mid-year change to their 2019 truck frame. This change will affect the fitment of gooseneck hitches on some of their trucks. Only 2019 trucks are subject to this change. Ford is no longer welding side plates to the inner frame above the yellow bumper over the rear axle. The change can only be confirmed with a visual inspection of the vehicle.

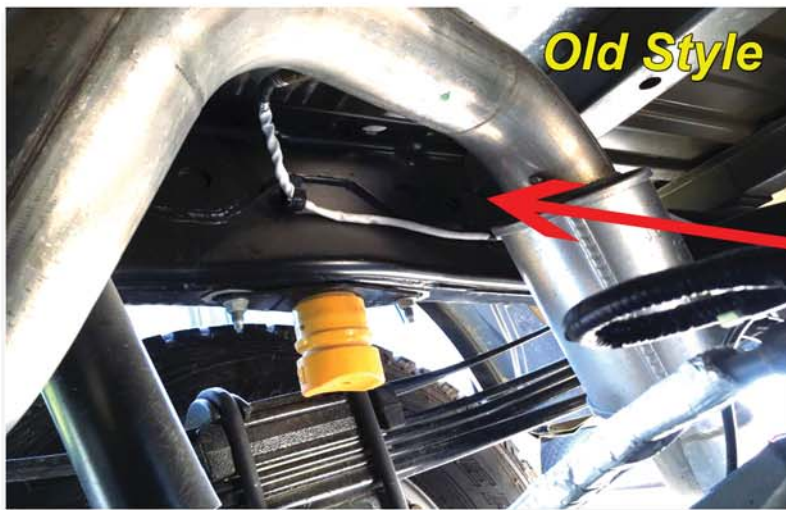

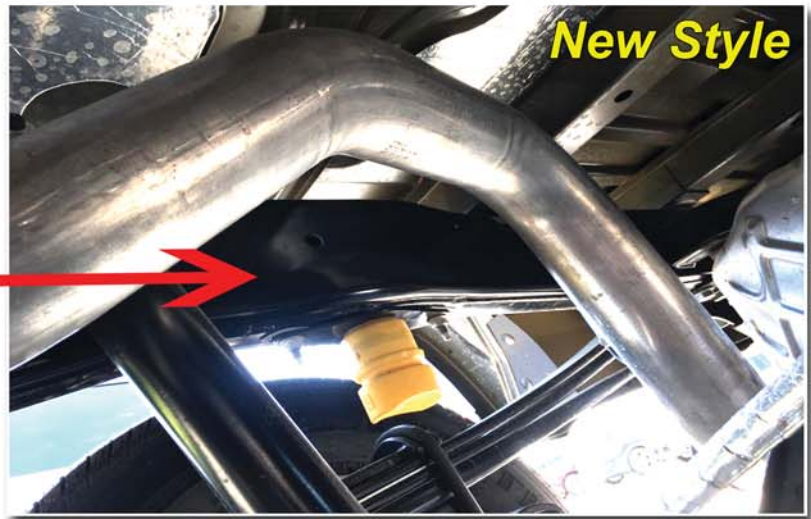

**BW1116** Will include the additional mounting plates/spacers if needed for the new 2019 trucks  
**BW1116** Will fit **2017, 2018** and **2019** trucks, refer to B&W fit guide for models included

**BW1117** Will fit **2017, 2018** and some early **2019** trucks (with welded on side plates from factory)  
**BW1117** Will be phased out of production do to the change in Ford's frame
